Registered Technical Objective Statement:

"Maintain 99.9% application uptime and configure automated failover mechanisms across cloud availability zones."

Active Engineer Logs & Status Comments:

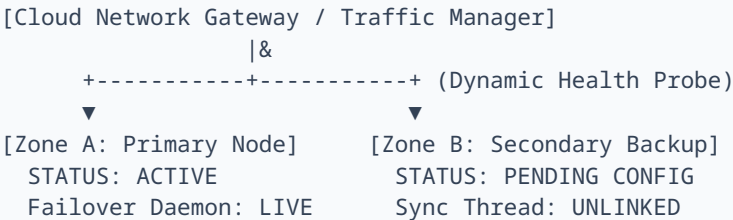

"Failover configured on primary, secondary pending."

2. SYSTEM VALIDATION, DIAGNOSTICS & TELEMETRY DATA

1. Infrastructure Resilience & Failover State

Architectural work was directed toward setting up automated active-passive recovery loops for the PrettyPie national aggregation application nodes. While primary site routing triggers are operational, the synchronous database replication lag monitors on the secondary target group remain unconfigured.
